

Pre-Installation Checklist for Granite Transformations

To ensure a smooth and efficient installation, we ask that you prepare the area by following the steps below. This will help our team complete your project on time and with the highest quality!

1. Access to the Area:

- Ensure clear access to the installation area (kitchen, bathroom, etc.)
- Remove any furniture, appliances, or items from countertops and surrounding areas.

2. Floor Protection:

- Our installers are equipped with basic protective coverings. If you want/require extra protection please make arrangements prior to installation. (FLOOR COVERING IS NOT NECESSARY PRIOR TO TEMPLATE!)

3. Electrical Supply:

- Confirm that electrical outlets and connections are accessible if applicable.

4. Plumbing:

- If you have paid for plumbing a **BASIC** Plumbing connection is what is provided. This means sink disconnect and reconnect. It does not include changing of supply lines, valve replacement or any additional plumbing work. These additional items will be charged by and paid directly to the plumber.
- Plumbing connections for sinks, faucets, shower trim, etc always takes place the day after installation. (If we are doing a Saturday installation then plumbing connections will take place on Monday)
- If you are getting a shower installed with us, plumbing will need to take place prior to installation (i.e. the valve) and then again the day after final installation to connect the trim kit.

5. Verify Materials:

- If you are providing materials (faucets, sinks, backsplashes, etc.) confirm that all materials **are on-site prior to template.** (If items are found to be missing during template, both template and installation are subject to reschedule.)
- Inspect materials for any damage or defects prior to template. If damage is seen and replacement is not going to arrive prior to the template please notify the office immediately so we can make schedule adjustments. (If you let us know ahead of time, no rescheduling fee will be charged.)

6. Scheduling and Surface Change Notifications:

- If there's any need to reschedule or if there have been **significant changes to the surface** since the initial estimate, please notify us as soon as possible.
- **A \$500 rescheduling fee** will apply if failure to notify us leads to a rescheduled installation. This fee helps cover our installers' time and resources for the day.

7. Final Sign Off:

- Customers must be present for the final walkthrough with the lead installer, be prepared to go over after care and sign the completion packet. **At this time final payment is due.**

Additional Considerations

- **Pets** - Arrange for pets to be kept in a safe area away from the installation site.
- **Children** - Ensure children are supervised and kept away from the installation area.
- **Special Requests** - Discuss any specific requests or requirements regarding the installation.

By following this punch list, you're helping us ensure that your installation is smooth, fast, and beautiful! We appreciate your cooperation and look forward to transforming your space.

DISCLAIMER: Please keep in mind that a template is required prior to the installation of the product. If this template gets changed for any reason it may affect the installation date (i.e. resulting in moving of the installation date)
