

RainSoft turns ordinary water into extraordinary water . . .

- Rugged
- Reliable
- Effective

Sediment Filtration System

Fully Automatic Whole-House Sediment Filter

A RainSoft Sediment Filtration System is designed to help solve special water treatment problems, and is built for long life and trouble-free operation.

Filtration System Features

Tank-Within-A-Tank Construction Rugged tank is wound with miles of glass filament for extraordinary strength. Inside there's another tank of sanitary plastic so your drinking water will never touch the interior fiberglass surface.

Exclusive Composite Valve Uses advanced NORYL™ composite material to enhance dimensional integrity, protecting the valve from expansion or shrinkage due to pressure and temperature demands.

Electronic Timer

Simple yet versatile controls. Set it and forget it; enjoy an unlimited supply of filtered water.

Power Outage Recovery If power is lost, the TC Series will automatically recover and complete the process once power is restored. This feature ensures that all scheduled regeneration cycles are never missed, and that filtered water is always available.

Powerful High Torque Motor Self-lubricating and with power to spare, for maintenance-free, long life operation.

Large Porting & Internal Piping The TC filter provides generous water flow rates.*

Manual Regeneration Tab A simple push of the tab starts a complete regeneration cycle giving you extra treated water if and when needed.

Automatic Bypass During Regeneration

Eliminates the inconvenience of being without water.

NOTE: Tank size and local water pressure will affect unit's operating flow rate.

CALIFORNIA RESIDENTS ONLY
Please note that your state certification information for this product is described on the back of the sheet.

The smart, economical way to enjoy the best water possible.

Choice of Filter Media

Filter Ag® This high efficiency, non-hydrous granular filtration media has high flow rates, low pressure drop and excellent sediment removal capacity to give you sparkling, clean water.

Filter Ag/Filter Sand Blend A special mixture of Filter Ag (above) combined with a high efficiency granular sand to provide high flow rate with maximum particle retention.

Application Limitations

Well pumps must produce a greater flow than the required backwash flow rate. Filter Ag® typically removes suspended solids down to the 40 micron range; particles less than 40 microns may require additional filtration. Actual results may vary based on local water conditions.

Maintenance Requirements

The filtering media will eventually become exhausted or consumed and will need replacement. The replacement schedule will depend on the incoming water quality and the amount of water you use. Your local authorized RainSoft dealer can provide you with replacement schedules based on your water-using habits and your incoming water quality.

The regeneration valve is designed to last a lifetime. From time to time it may be necessary to clean and lubricate the moving parts. Your water quality and the amount of regenerations will affect this schedule. Your dealer is knowledgeable in different water qualities and the necessary parts required in completing this service.

CALIFORNIA RESIDENTS: Water treatment devices sold to retail consumers in California accompanied by certain health claims must be certified by the State of California Department of Public Health. The RainSoft TC-FIT A and AS Series filters are not certified by the State of California for the purpose of making health claims.

RainSoft Model TC-FIT A & AS Series filters are UL and CSA Listed, and certified by TÜV to meet European CE requirements. Refer to the manufacturer's Performance Data Sheet for specific claims and certifications.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, AWTP, LLC. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. AWTP, LLC does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
